# SOMEHOW SOME THINGS ARE JUST MAGIC.

The Beatles have through their music and lyrics touched the minds, and connected with the lives so many of us in so many ways. Their music was created in, and helped create, a magical, mystical time during which human artistic power flourished. It's no surprise then that the same era and people could help bring us some of the world's most beautiful, distinct and memorable album art.

These exclusive limited-edition trolley cases breathe life into this artwork again in vivid color and stunning quality. Beyond the beautiful artwork that will make your case stand out at baggage claim and beyond, this is a true high-tech piece of luggage built to last and work perfectly for many years to come.

The outer shell is made from the highest quality "pure virgin" ABS with a reinforcing outer film in polycarbonate (the same stuff they make shatter-proof glass from), and ensures lightweight strength. A special integrated four-wheels system has a low center of gravity and makes maneuvering the cases a dream. Our fully lined interior with zipped divider and pockets makes packing and organization easy. Integrated TSA-lock® adds security and helps the TSA Authority in doing their job without damaging your case.

We hope this case adds some magic to your trip!
